Education

Gujarat Technical University

Bachelor of Science in Computer Science

3.57/4 GPA

Conestoga College

Web development

Technical Skills

Technologies/Frameworks: NextJS, NodeJS, ReactJS, TailwindCSS, Spring Boot

Developer Tools: VS Code, GitHub, Postman, Docker, MongoDB Atlas, Digital Ocean

Database: PostgreSQL, MongoDB, SQL, Firebase, DynamoDB

IT Subject: DBMS, OOPS, Data structure, OS

Experience

Durvasa Infotech

Software Engineer Intern

June 2022 – Aug 2022

- Building backend services and APIs in NodeJS, MongoDB and with spring boot & postgresSQL.
- Implemented Frontend with ReactJS and used TailwindCss for design.
- Setup a third party payment (Stripe and RazorPay) in backend application.

Software Engineer

Sept 2022 – Nov 2023

- Develop and maintain MERN applications emphasizing API design with MongoDB & ReactJS interfaces with Node.js and Express.js integration.
- Successfully designed and implemented multiple endpoints in Golang with PostgreSQL including database interactions with MySQL, in a Spring Boot application, highlighting expertise in comprehensive backend development and API integration.
- Set up Git-based CI/CD pipelines for automated testing and deployment

Projects

Aakalp Project (Hackathon) | [Github](#) | ReactJS, AWS, NodeJS, MongoDB, DyanmoDB, Google Map API

- A web app for getting feedback from non functional streetlight.
- It shows streetlight working status on google map with marker along with current and few other details such as adding street lights, assigning supervisors for work, getting mail/notification when street light stopped to work.

Event Management app | [Github](#) | Golang, PostgreSQL

- Created REST Api for Event Management app with Golang & PostgreSQL using Gin Web Framework with MNC Architecture.
- Implemented Authentication with JWT Token with advance authorization using middleware
- User can post events & people can see the list of events. Also, Implemented CRUD in Events & User model.

Booking.com clone | [Github](#) | ReactJS, NodeJS, MongoDB, TailwindCSS

- Built Hotel booking system with various features such as payment gateway, sorting hotel list with price and other filters, pagination, rating and many more
- Admin panel side for managing hotels with form validation in each page using formik & joi

Blog App | [Github](#) | NextJS, TailwindCSS, Auth 2.0, MongoDB, Prisma

- Created NextJS Blog using Auth2.0 for Authentication with dual theme.
- User can Post the post & people can see the blog and do engagement via comments and can see the no. of viewer. .
- Created Modern User Interface with TailwindCSS and used MongoDB as database along with using Prisma.
